TITLE: GRADE RE-EVALUATION POLICY

In an effort to increase educational goal obtainment and reduce barriers to enrollment and progression, Grade Re-evaluation allows current students who have a past unsuccessful academic record to restart their educational experience. This re-evaluation permits students to reset their Grade Point Average when previous academic performance is not reflective of the student’s current academic level or ability. This policy will assist the student whose grade point average from a previous semester is significantly lower than the work the student has completed in current semesters.

Grade re-evaluation is a one-time-only opportunity. The permanent academic record shall be annotated in such way that all work remains legible, ensuring a true accurate academic history. A student may request up to 18 semester hours of course work to be annotated and removed from the computation of the student’s grade point average.
